About Me

An Information Technologies Technician, currently pursuing a Bachelor's Degree in Systems Development. I possess a strong foundation in programming, particularly in Python, and hands-on experience in technical support, problem-solving, and analysis. I am actively seeking an opportunity to join a team as a Junior Developer in application support, where I can apply my skills in Git, programming, and my analytical abilities. My goal is to grow professionally, contribute to system stability, and specialize in technologies like Kubernetes within a dynamic environment like Softtek.

Education

Bachelor's Degree in Web Development

Universidad de Guadalajara

(2021) (In progress)

Technician in IT

Universidad Tecnológica de Tabasco

(2018 – 2020) (Completed)
